ATHENS BIOSCIENCE, INC.™

1 October 2026

Change Control Notification Document #0013
Products Entering End

Please distribute this information to the appropriate departments and personnel within your organization.

Description of Change

This letter serves as notification that Athens Bioscience has designated the products listed below for discontinuation upon depletion of existing inventory.

These products will remain available for purchase while current inventory is available. Athens Bioscience does not plan to manufacture additional lots once existing inventory has been depleted.

The following catalog numbers are affected:

Product	Catalog Number(s) Being Discontinued
Cathepsin D, Bovine Spleen	16-SP-030104-BOVINE-1000U

Reason for Change

This change is being implemented as part of Athens Bioscience's ongoing review and rationalization of its product portfolio. The affected products have been identified for discontinuation based on commercial demand and manufacturing considerations.

Impacted Documents

Product listings, catalogs, price lists, and other commercial documentation will be updated as affected products are depleted and discontinued. Product-specific documentation, including Certificates of Analysis (COAs) and Safety Data Sheets (SDSs), will remain applicable to existing inventory while those products continue to be offered for sale.

Timing of Change

There is no immediate discontinuation date for the affected products. Existing inventory will remain available for purchase on a first-come, first-served basis until depleted.

Additional Information

The affected products will remain available for purchase while existing inventory is available. Athens Bioscience does not currently plan to manufacture additional lots once existing inventory has been depleted. Removal of a catalog number from Athens Bioscience's general commercial offering does not supersede separately established customer-specific supply arrangements.

Customers with anticipated future requirements are encouraged to contact Athens Bioscience regarding current inventory availability. Where appropriate, alternative products, sizes, or custom options may be available and will be evaluated on a case-by-case basis.

For any questions regarding this notification, please contact our technical support team at sales@athensbioscience.com.

Best Regards,

Athens Bioscience, Inc.
